

Raj Parmar

Adelaide, SA • rajparmar.au@outlook.com • LinkedIn • GitHub • Portfolio

Cloud Infra and Security Engineer with **3+ years operating large-scale systems on Azure and AWS**. Background in Python, Java, Node.js development, CI/CD automation, and on-call monitoring. Co-author on a workshop paper extending hybrid identity graph synthesis for attack-path analysis.

EDUCATION

University of Adelaide <i>Master of Computer Science (Cumulative GPA: 5.8 / 7)</i>	Adelaide, SA June 2026
CHARUSAT University <i>Bachelor of Technology – Information Technology (Cumulative GPA: 8.49 / 10)</i>	Gujarat, IN Jul 2022

WORK EXPERIENCE

Celebal Technologies <i>Cloud Infra & Security Engineer</i>	Jaipur, IN Dec 2021 – Jan 2024
- Designed and operated enterprise platforms on Azure/AWS for 5+ enterprise clients in production environments. - Built CI/CD pipelines and via Terraform, speeding releases and improving consistency by across 500+ resources. - Managed production cloud services on-call; built monitoring/alerting via Log Analytics reducing response time by 25%. - Shipped on-prem to cloud migrations; applied RBAC and network security policies to cut security incidents by 90%.	

ACADAMIC AND INTERNSHIP EXPERIENCE

University of Adelaide <i>Teaching Assistant</i>	Adelaide, SA Mar 2025 – Present
- Tutored Computer Networks, Cloud Platforms, and Databases for 400+ students with a 4.5+/5 SELT rating. - Collaborated with the course coordinator on exams, course roadmap, assignments, and structural deadlines. - Developed standard tutorial and practical materials utilized by 10+ fellow teaching team members.	
Talent Academy <i>DevOps & Automation Intern</i>	Adelaide, SA Jan 2025 – Mar 2025
- Programmed automation scripts across 4+ Zoho apps and deployed automated testing to lift operational efficiency by 30%. - Executed comprehensive SEO infrastructure fixes that lifted targeted core keywords from page-2 to page-1 (rank 1) on Google.	

RESEARCH & KEY PROJECTS

ADSynth – Hybrid Multi-Tenant Identity Graph Synthesis <i>Research Software Engineer, University of Adelaide</i>	2025 – 2026 GitHub
- Designed a Python framework generating hybrid AD–Entra ID identity graphs, closing gaps in on-prem attack generators. - Engineered quantitative evaluation pipelines benchmarking graphs across multi-seed runs to anchor the paper's core findings. - Built automated validation, BloodHound-compatible Neo4j export, and reproducibility bundles for external research reuse.	
LiveWell – Agentic AI Health Companion <i>Full Stack Engineer & Backend Lead, University of Adelaide</i>	2025 GitHub
Led a 3-person project end-to-end: drove architecture, set technical direction, and resolved complex React Native issues. - Shipped an AI chatbot with a custom memory design, cutting token usage 60%+ while preserving response quality. - Architected a production-ready Node.js / Express backend on AWS exposing 35+ REST endpoints for tracking and auth.	

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, Bash, SQL, KQL, Cypher
Backend Frameworks: Node.js, Express.js, Spring Boot, REST APIs, Microservices, Event-Driven Architecture
Cloud & DevOps: Microsoft Azure, AWS, Terraform, Kubernetes, Docker, Azure DevOps, GitHub Actions, ARM Templates
Networking: VPN, Load Balancing, Firewall, DNS, DHCP, Routing Protocols, Hybrid Connectivity
Identity & Security: Azure AD / Entra ID, Active Directory, AD FS Federation, RBAC, OAuth2 / JWT
Monitoring & SRE: Azure Monitor, Log Analytics, Grafana, ELK Stack, Alerting Pipelines, Incident Response, SRE
Databases: MongoDB, Cosmos DB, Neo4j, MySQL, PostgreSQL, Redis

CERTIFICATES

- Microsoft Certified: Azure Network Engineer (AZ-700) • Solutions Architect Expert (AZ-305) • Administrator Associate (AZ-104)
- AWS Certified: Cloud Practitioner Essentials
- Anthropic: Claude Code in Action
